KLEMKO PIR-SMART PRESENCE DETECTOR
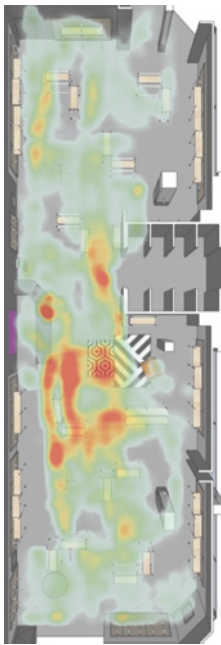

AT REST® TECHNOLOGY

Revolutionary **Sentistic technology** for smarter and more sustainable building management.

Always. klemko.

klemko®
ELEKTROTECHNIEK

Step into the future of optimal building management. Choose the innovative Klemko PIR-Smart presence detector. Thanks to the smart PIR sensor, the detector responds only to human presence. Unnecessary triggering, for instance due to warm air currents, are therefore now a thing of the past.

At Rest® Technology

With the intelligent "At Rest®" technology, developed by Sentistic software, lighting only remains switched on if people are present in the room, even if they would not move for a long time.

The PIR-SMART presence detector gives you valuable insights from the recorded thermal image. This allows you to determine, completely anonymously, exactly how many people are in a room and how they move within the building. The benefits of our system? Among other things, significantly more efficient use of yoyr space and energy savings of up to 40%!

Monitoring building usage

Sentistic also offers a user-friendly dashboard for data processing and is ready to help with integration into your building management system. Discover the smart future of building management with Klemko PIR-Smart Presence Detector.

- ✓ **Always detected, even AT REST®**
- ✓ **No false triggering**
- ✓ **Counts people anonymously**
- ✓ **Improves space utilisation**
- ✓ **Increases safety**
